SPRINT - 1

Date: 02 November 2022

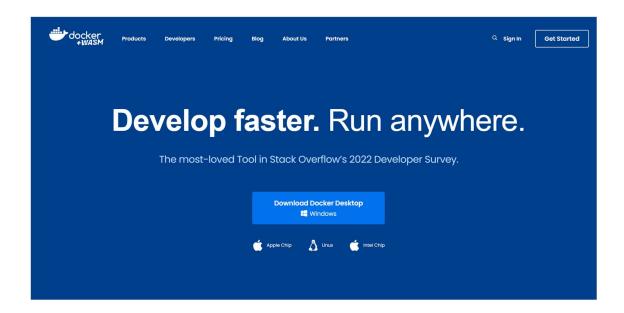

Team ID: PNT2022TMID21408

Project Name: Personal Expense Tracker Application

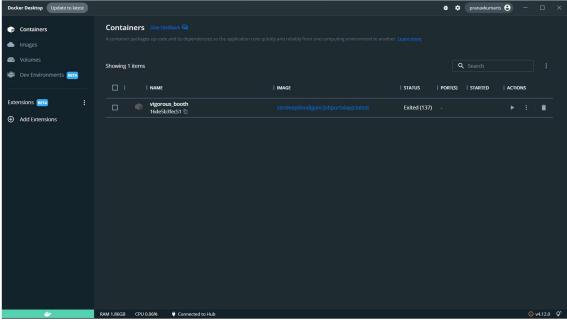

SETTING UP APPLICATION ENVIRONMENT

INSTALL DOCKER:

STEP1: Download docker installer from https://docker.com

STEP 2: Install docker desktop using the installer and check docker cli by executing 'docker' in command prompt

```
:\Users\Pranavkumar T S>docker
Usage: docker [OPTIONS] COMMAND
     self-sufficient runtime for containers
Options:
                           --config string
                                                                                                                  Location of client config files (default
                                                                                                                    "C:\\Users\\Pranavkumar T S\\.docker")
         -c, --context string
                                                                                                                  Name of the context to use to connect to the
                                                                                                                  daemon (overrides DOCKER_HOST env var and
                                                                                                                   default context set with "docker context use")
         -D, --debug
                                                                                                                   Enable debug mode
         -H, --host list
                                                                                                                   Daemon socket(s) to connect to
                                                                                                                  Set the logging level
("debug"|"info"|"warn"|"error"|"fatal")
(default "info")
         -1, --log-level string
                                                                                                                   Use TLS; implied by --tlsverify
                                                                                                                 Trust certs signed only by this CA (default "C:\\Users\\Pranavkumar T S\\.docker\\ca.pem")
Path to TLS certificate file (default "C:\\Users\\Pranavkumar T S\\.docker\\cert.pem")
Path to TLS key file (default "C:\\Users\\Pranavkumar T S\\.docker\\cert.pem")
                        --tlscacert string
                        --tlscert string
                        --tlskey string
